THE REDCLIFF REVIEW THURSDAY, NOV. 5th, 1936 Number 51

Premier Wants Co-operation of Alberta 'People'

Might As well Throw Up His Hands if Not

At the Prophetic Bible Institute meeting in Edmonton last Sunday Premier Aberhart intimated it might take longer than the 18 month limit he mentioned at election time to put social credit into operation He agreed with some of his friends he was working too hard but "if I am allowed a little more than 18 months to complete the job, I need not rush so much."

Mr. Aberhart admitted he had said he might as well throw up his hands and resign in three or six months if the people of Alberta refused to co operate in the use of their own credit. This statement, he said did not mean he was intending to resign or even that he contemplated resigning as interpreted in some quarters.

If conditions throughout the province in connection with the circulation of prosperity bonds are the same as they are in this part of the province we are not surprised at Mr Aberhart saying: "he might as well throw up is hands if the people of Alberta refused to co-operate in the use of their own credit."

Judging from conditions in this part of the province it is our opinion that when Mr Aberhart refers to the "People" of a province refusing to co-operate, he is referring to a very large percentage of the "people" of this province who put him in power.

People who were 100 per cent Social Credit fifteen months ago were carried away by promises of $25 a month. They knew no more about what Social Credit meant than a goose knows about Christopher Columbus. At that time nothing was mentioned about prosperity bonds or the stamps the holders of them had to put on them, nor the 2 per cent tax on the goods they had to buy. Now it is different. For a few weeks after prosperity bonds were issued we saw them frequently. Now they are as scarce as hens (teeth. Why? Simply because Social Creditors themselves preferred real money to prosperity bonds.

[illegible] Not Says Cannot Be Otherwise

The Alberta government [illegible] $2,250,000 which fell due last Monday, was defaulted on account of the [illegible] shortage. The interest at three per cent will be [illegible] indefinitely.

Warned [illegible] by federal government and the Bank of Canada [illegible] efforts to borrow the money the Alberta Social Credit Premier said: I don't see any thing else for us to do but default. I am sorry but it is impossible for us to do otherwise

Shed on Allan Ellis' Property Burned Down

Started From Fire in Small Gas Heater

The shed on the rear of Allan Ellis' property just south of the Glass Plant, was burned to the ground last Monday about 10 a m.

The fire is supposed to have started from a small gas heater in the hen house part of the shed. As the blaze was beyond control before the brigade arrived the firemen used the hose on the garage just a few feet away and saved it from any damage. Early arrivals managed to save most of the contents of the shed except a few of bantums and five or six pigeons which were in seperate compartments.

There is in Canada what is known as the "National Association" which has apparently been dorment for somee time but is now becoming active again What has brought it to life is the fact that it has recently noticed that during the first six months of this year we received in Canada 5,252 imigants of which only 912 were British subjects. The Association complains of this unfavorable comparison between British and foreign subjects coming to Canada, and suggests that only such immigrants as requested by the several provinces should be admitted to this country.

—o—

An all-British air mail and passenger service between England and the Canadian Pacific Coast is predicted to be in operation by 1938.

Churches

ST MARY'S CHURCH

Mass will be celebrated on the 3rd Sunday of each month at 8:30 a. m

* * *

Evensong on this day will be the special British and Foreign Bible Society's service Service in charge of Rev. Ellison and the Vicar. Specila preacher Rev. Lytle.

Armistice Day—Peace Day [illegible] "Peace" 10:45 a m at [illegible] Preacher Rev Ellison

MEMORIAL UNITED CHURCH

Rev H. M Ellison, Pastor

10 a m Church School.
11 a m Armistice and Remembrance service Subject: "The Big Peace, Preparing for War"

No evening service in this church. Congregation will unite with the Anglican Church, 7:30 under the auspices of the Bible Society. A union choir will lead the singing.

On Wednesday, Nov. 11th union service in the Church of England at 10:45 a m. Every body invited to attend

Bill's Widow In Alberta

Bill farmed for 18 years in Alberta. He died in 1931. He left a widow and two small children, $5,000 in life insurance and a farm and stock that sold for another $5,000.

Mrs Bill, acting upon the best advice she could get, loaned $5,000 on a first morgage in Calgary at 6 per cent. The rest of her money she also invested in Alberta - $3,000 in Provincial bonds, and $1,000 in Municipal bonds, and $1,000 in the bonds of her School District all yielding 5 per cent.

Her capital of $10,000 was securely invested; her income from it, the rental for the use of her money, amounted to $550 a year. She and her children were safe with Alberta. Alberta would not let them down.

And now what does Alberta propose to do? It proposes to cut the interest on her Provincial bonds in half and to reduce the interest on her Municipal and School bonds to 3 per cent.

And further it would reduce her mortgage by the amount of interest that she has received for the past four years, and and force her to accept re-payment of the reduced mortgage in ten annual instalments without any interest.

Contract the income of Bill's widow and her two children, in 1931, with what it would be today under such proposals:

In 1931 Bill's widow had an income of $g50 a year. Under Alberta's proposals, her yearly come would now be $135.

In 1931 this widow had $10,000. Because the credit of the province has been so greatly impaired, Alberta bonds are now worth only about half what she paid for them; her mortgage is reduced by $1,200 she is denied interest on the balance, and in ten years, the mortgage may be wipde out entirely.

The case of Bill's widow is only one of many similar cases in Alberta. Life insurance, as the cardian of the hard earned savings of 3,500,000 Canadian policyholders, protests against legislation that repudiates public and private debts, regardless of the debtors ability to pay and tends to destroy ownersnt, in public and private property.

Redcliff Young Lady Married Last Monday

McCoy — Todd

A quiet wedding was solemnized in Gordon Memorial Chuch Manse on Monday Nov 2nd at 4 p m when Miss Anna Todd, daughter of Mr and Mrs J Todd of Redcliff was married to Mr Kenneth McCoy of Duchess. Rev H V Ellison performed the ceremony.

Miss Alice Todd Supported the the groom. The oung couple bride and Mr. Rusel Crawford will reside on the farm of the groom at Duchess.

—o—

Stratton — Mehr

Mr Robt Stratton, son of Mr and Mrs. Jas. Stratton, was recently married to Miss Millie Mehr, of Medicine Hat. The young couple will reside in Redcliff.

Loans May be Secured For Repairing Homes

Borrowers Must Be of Good Character and Working

The Home Improvement plan of the Employment Commission is now in effect. Loans up to $2,000 or repairs and improvements to home owners are set at maximum period of three years. A home owner of good character and an income applies to his bank manager stating the amount he wants and the purposes for which he is to use it. Farmers come under the same basis as urban dwellers.

In terms of discount and interest, the charge is 3¼ per cent discount on a one year loan repayable in monthly instalments. This is the same as 6:32 per cent annum effect.

For example, on his note for $100 drawn for a year the borrower receives $97 75 He will pay back the loan in 12 instalments of $8.34 each. On the two-year note of $100.00 the borrower will get $93.93 and pay back 24 instalmnts of $4.15 each. The plan was made possible by an arrangement between the goverment and banks under which the formeer guarantees the latter against losses up to 15 per cent. on eht aggregate value of loans.

Local Legion Selling Poppies Next Week

Be Sure To Have One For The Remembrancee Day

Remembrance Day, which falls on Wednesday, Nov. 11th, will be observed throughout Canada as a public holiday.

For this occasion tre local legion will ha made arrangements for the sale of poppies on that day in remembrance of tha 60,0000 Canadians who are now in France and Belgium graves.

As the funds for this sale are to be used for worthy purposes the canvassers should be well patronized Be sure to wear a poppy on Remembrance Day

Five Young Robbers Get Heavy Sentence

Were in This District For The Past Three Weeks

During the past three weeks there have been a number of robberies in Medicine Hat, Irvine, Walsh, Golden Prairie and Munson. The P C M P got on the trail of the thieves and finally rounded up the quintette of young men together with a considerable amount of the variety of goods they had stolen. The culprits where taken into court and pleaded guilty to 33 charges of breaking and entering and theft. The three ring leaders, Walter Cantwell, 23, Roy Armstrong 27, and Colin Allen Trew 30 were each sentenced to six years imprisonment; while Joe Grant 25 and Wm Dolgapol 25 drew four years each.

The quintette had evidently been out on a robbing expedition expecting to make a clean up for the winter, by raiding the smalleer towns.

New Uses For Old Products

The agricultural depression which has contracted the farmers' pocket books in Western Canada almost to the vanishing point in the past five or six years may be attributed to two main causes—a drought cycle and an undisposable surplus stock of wheat of great proportions, the inheritance of the bountiful harvest of 1928, followed by a fair average crop the succeeding year.

The drought was a visitation of Nature itself, over which mankind could have little or no control, and if this had been the sole cause of an attenuated agricultural bank account the effects of the depression would not have been nearly so severe in Western Canada as they have been, for during the era of gloom the drought area shifted its local somewhat each year though, it is also true, that there are some areas which have sustained the full impact for the entire period.

Over the entire depression period, however, many areas which have experienced drought have reaped some harvests, varying widely in degree, and had good prices for wheat prevailed, many farmers over large tracts would have reaped sufficient returns to carry them through without aid or with comparatively little assistance.

Unfortunately however, this was not the case and the average comparatively low price of farm products and particularly wheat, at times far below the cost of production, was as much a factor in creating conditions which have necessitated debt adjustment on a wide scale as was the lack of moisture and its resultant dustatorms and scourge of insect pests.

Dry periods undoubtedly will come again and little can be done to circumvent their ill effects in loss of production and yields beyond perhaps a small measure of conservation, but the lesson of the six year period will have been lost unless some consideration is given to the necessity and wisdom of devising some measures to obviate, or at least reduce, the hazards of a repetition of prices below the cost of production.

There are several directions in which concentration on this problem might well be directed, apart from the erstwhile popular proposal to curtail production. There is the matter, for instance, of efforts to create consumer demand in existing markets for improved and more tasty products of the grain fields, to which reference has previously been made in these columns, and serious consideration might well be given to the possibilities of converting products of the field to industrial uses in the domestic market.

Henry Ford demonstrated that much might be done to make agricultural products available to industry when his experiments revealed that by-products of the soy bean make excellent material for construction of certain automobile parts and accessories, and along similar lines, experimentation in the conversion of grains into alcohol for industrial use and on a commercially feasible basis should be pushed with vigor in the laboratories.

So far the conversion of grain into industrial alcohol has not proved a commercial success, but a fractional advance in the price of gasoline or a reduction of a few cents in the cost of production of alcohol from such sources would place it in the field of a competitive fuel with gasoline, a commodity which is used in large quantities by the farmers themselves as well as other consumers in Western Canada.

That greater use of alcohol as a fuel is inevitable in the not far distant future is the conclusion of the "Pennsylvania Farmer" which, in a recent issue had the following to say on the subject:

"The farmer has a double interest in liquid fuels. He is now a leading consumer; he may some day be an important producer. Alcohol made from farm crops can be mixed with gasoline to make a fuel which will run a combustion engine. Since the supply of petroleum cannot last forever a wider use of alcohol as a fuel is inevitable. It is being hastened by a score of foreign countries by legislation requiring, by taxation or otherwise, a mixture of alcohol with gasoline.

"Without such government intervention the blending does not occur, because gallon for gallon, gasoline is cheaper and better than alcohol. Under present conditions the effect of this legislation is to subsidize the producer of alcohol at the expense of the consumer of fuel. When producer and consumer is the same fellow it is doubtful if he wants this subsidy.

"In our country the farmer consumes a fourth of the gasoline used. If the price were raised four or five cents a gallon, the extra cost would cut the profits from corn, sugar cane, potatoes, etc., that went into alcohol, while the farmer who grew no alcohol-producing crops would be dealt with unfairly.

"Until gasoline prices advance materially it would appear that hopes for a wider use of alcohol as fuel lie in research rather than in legislation. When alcohol can be made cheaper or better than gasoline, no law will be needed to promote its use, and until then any such law is of questionable value to farmers."

Easy To Define

A young man in college was applying pressure for more money from home.

"I cannot understand why you call yourself a kind father," he wrote his dad, "when you have not sent me a cheque for three weeks. What kind of kindness do you call that?"

"That's unremitting kindness," wrote the father in his next letter.

Worth about 10 times its weight in gold, a species of double fringed petunia seed is quoted at $384 an ounce, in Boston.

One London firm regularly supplies 6,000 customers with heelless shoes.

Judge Was Obliging

Justice will wait in district court at Hastings, Nebraska, until Attorney F. L. Carrico's false teeth are adjusted. Counsel for a plaintiff in a damage suit, Carrico came into court armed with a dentist's statement that his loose bridgework impeded elocution. A sympathetic judge continued the case to the next term.

Extracting Precious Metals

A New Science In The Mining World To Assist Operators

"Mineralography," a new science in the mining world designed to assist mining operators in their work of extracting precious metals, was described and demonstrated to delegates of the British Columbia division of the Canadian Institute of Mining and Metallurgy meeting at Vancouver.

In a darkened room pictures of hiding places of particles of gold among base minerals were shown, magnified many times, while Dr. M. H. Haycock, of the Dominion department of mines, and Dr. H. V. Warren, of the University of British Columbia, stood in the background and described the new science.

Specially constructed instruments were used to polish ore specimens to the finest surface possible and these are magnified many times by powerful glasses for scientific study.

In this way, the two doctors said, the new science has already become of great assistance to the mining industry and promises to become still more valuable in determining the best treatment for gold extraction and mineral separation generally.

SELECTED RECIPES

ALMOND MERINGUE CAKE

½ cup butter
1½ cups powdered sugar
4 eggs
1¼ cups flour
¼ cup cornstarch
4 teaspoons Magic Baking Powder
½ cup milk
1 teaspoon almond extract
½ cup almonds blanched and shredded

Cream butter, add sugar gradually, beating all the time. Add the well beaten yolks, sift together three times flour, cornstarch and baking powder, add to butter mixture alternately with the milk. Add flavoring then the stiffly beaten whites of eggs. Turn into a buttered 9-inch square pan about two inches deep and cover with the almonds and sprinkle with powdered sugar. Bake in moderate oven (350 degrees F.) 30 minutes. Just as soon as the meringue on cake begins to turn color cover with thick brown paper, as when finished baking the meringue should be a very delicate brown.

Claims World Undernourished

Australian Specialist Thinks More Protective Foods Should Be Produced

The world is undernourished, F. L. McDougall, Australian agricultural specialist, said in a report to the biennial general assembly of the International Institute of Agriculture at Rome.

Many world agricultural problems would be solved, he said, if certain nations would increase their production of "protective foods" instead of concentrating on high wheat yields.

"Satisfactory human diet must contain sufficient quantities of the kinds of food that provide these hitherto obscure elements of nutrition," the Australian said, explaining "the foods particularly valuable in this respect are milk, cheese, butter, fresh fruit and vegetables, eggs, fish and meat."

Coronation Oath

May Be Slightly Changed To Comply With Statute Of Westminster

When the king takes the coronation oath at Westminster Abbey next May 12 he may use a form of words different from that of his predecessors.

It was made known the oath has been slightly altered in order to comply with the provisions of the statute of Westminster, which changed the status of the dominions.

The new wording, evolved after consultation between ecclesiastical and constitutional authorities, will not be revealed until the full program for the coronation is issued. It is understood the coronation service will be shorter than at the coronation of King George V. because of the absence of a queen consort.

Rare Plants In North

New rare plants have been discovered in the Canadian Arctic by Dr. Nicholas Polunin, a British botanical authority, in a comprehensive survey of northern flora made during the eastern Arctic patrol of the Canadian government. Dr. Polunin, two years ago, made a similar study which he extended on the present expedition. He returned to Halifax on the steamship Nascopie.

Well Protected

Spains $700,000,000 gold reserve lies in practically impregnable vaults seven stories below the Bank of Spain building in Madrid, enclosed with seven-foot-thick armored steel and concrete. 2173

COULD NOT LIFT ARMS ABOVE HEAD

Owing to Painful Rheumatism

This woman suffered from rheumatism in her back, arms and legs. For two months she endured this painful condition, then, like many another sufferer, she decided to try Kruschen Salts. Read her letter:—

"About fifteen months ago I had rheumatism in my arms, back and legs. The pains in my arms and legs after getting warm in bed were almost unbearable. I was like that for two months, and could not reach above my head. I read so much about Kruschen Salts that I thought I would try them. I am so glad to say that for more than a year I have not had the slightest return of my rheumatism."—(Mrs.) H.E.

The pains and stiffness of rheumatism are frequently due to deposits of uric acid in the muscles and joints. Kruschen Salts assist in stimulating the internal organs to healthy, regular activity, and help them to get rid of this excess uric acid.

British Croesus

Government Still Checking Up On Estate Left By Sir John Ellerman

For three years, a small army of government clerks have been checking up the estate left by Sir John Ellerman, little-known "richest man in England's history"—and they are still hard at it.

His Majesty's government can well afford the clerks' time. It expects to collect nearly £20,000,000 (about $100,000,000), or 50 per cent. of the huge fortune, which keeps on growing.

Sir John, ship-owner, Industrialist and real estate magnate, died in 1933 at the age of 71. His estate was then valued at £17,333,977 (about $86,119,855) "as far as can be ascertained." But only recently it was reworn at £30,684,994 (about $153,-424,970), and even at that figure, additional property including large foreign interests was not included.

Tax investigators have discovered more and more holdings. The final figure is expected to be about £50,-000,000, or approximately £200,000,-000. Exactly half of that goes to the government.

The British croesus left the bulk of his fortune to his son, the present Sir John Ellerman, now 27.

Already £14,000,000 has been turned over to the treasury in death duties—by far the largest sum the inland revenue department ever received from one estate. In addition, it is estimated that during his lifetime Sir John paid at least £20,000,-000 in income tax and super-tax.

Strange Bequest

Two Sisters In England To Receive $600 A Month If They Keep Men Away From Their House

Two Baxter sisters of Harrogate, Eng., both in their 70's, will have an income of £120 ($600) a month if men keep away from their house.

Their brother, William Henry Baxter, died at the age of 86, leaving an estate of more than £250,000 ($1,250,-000). He left them the monthly allowance on condition they do not allow any male person to reside in the house.

The sisters are Georgina Todd Baxter, 75, and Lily Thorman Baxter, 78.

Said Miss Todd: "I am afraid he was very jealous of other men where we were concerned. He objected to us speaking even to the gardener. Though he was very close at home with money he would occupy the best suite in the best hotels in London."

Yugoslavia's Boy King

Brief English Schooling Has Left Traces On His Character

What has particularly pleased the boy King Peter II. of Yugoslavia is the fact that he was able to spend his birthday with English relations. The Duke of Kent is his hero and the Duchess is favorite aunt. Although King Peter is not likely to continue his English schooling, the brief time he spent in England two years ago has left a definite trace on his character, says the Daily Sketch. His grandmother, Queen Marie of Rumania, favors this and does all she can to stimulate his English interests. He already speaks excellent English.

Fall Wheat Sown

At Spring Coulee in Southern Alberta considerable fall wheat and rye has been sown in the hope of getting crops next year. Rains have revived the grass on the Blood reserve and some hay has been cut from irrigated lands. Grain yields in the district were ten bushels for wheat and twenty for oats.

A motion picture theatre has just been opened in Santiago, Chile, which is air conditioned and both earthquake and fireproof.

Playing Chess By Letter

Principals In Minnesota And South Africa Engaged In Slow Game

The world's slowest chess game is in progress in Blue Earth, Minnesota. One player is in Blue Earth and the other in South Africa. The players indicate their moves by letters to each other. As it takes 30 days for a letter to travel from one player to the other, the game is likely to continue for another five years. The principals in the match are John Brooks, president of the Johannesburg Chess Club, and Don Fitch, of Blue Earth. "It is a very thrilling game," Fitch declares. "Sometimes I sit up half the night deciding on the next play after I hear from Brooks. He's a pretty tough opponent, but he can't beat me before 1940 anyhow.

Television In Britain

Nothing Can Be Televised More Than 1,000 Yards From Transmitting Station

Although British television has now reached the point of efficiency whereby daily programs are broadcast from Alexandra palace, the day apparently still is distant when a citizen will be able to enjoy a sport event from the depths of an arm chair.

At the present stage of development nothing can be televised more than 1,000 yards from the transmitting apparatus at Alexandra.

The owners' sets recently showed Archie Compton, British golf pro, giving a lesson to a pupil on a miniatures course at Alexandra and easily followed the flight of the ball.

Were Made To Last

Saskatchewan Woman Has Used Two Kitchen Utensils 54 Years

Back in the days when hardware was hardware, or as the old-timer says: "They made things to last," Mrs. C. A. Jaques, of Briercrest, Sask., bought a can opener and a pancake turner. That was in 1882 at the store of Henderson and Sons at Collingwood, Ontario.

The two kitchen utensils have never been out of the possession of Mrs. Jaques and she has used them on every possible occasion during the past 54 years.

Mrs. Jaques is the wife of Capt. C. A. Jaques, one of the old time captains on lake boats plying the Georgian Bay, where, according to the captain "storms were storms."

Captain and Mrs. Jaques are the parents of one of Canada's well known authors, Mrs. Edna Jamieson, better known as Miss Edna Jaques.

Film drama in the home, via television, may be given the true big theatre touch. It would require a tall member of the household, to sit squarely between one and the screen.

The zootrope, a toy revolving cylinder with slits through which a series of pictures were seen in apparent motion, was invented 30 years before the motion picture.

In The Cause Of Peace

Delegate Says There Is A Momentum Behind The Peace Movement

Mrs. John Grieve, League of Nations Society delegate to the recent peace conference at Brussels, following her return to Toronto, said that the prevailing mood of the conference was "neither optimism nor dismay, but one of determination."

People in Europe, she said, appeared to believe war was inevitable but that the danger was not immediate.

"The idea of the congress was to bring together on a limited platform as many people as possible, to establish a central bureau in each country to effect this platform, and an international bureau to co-ordinate the work in all countries," she said.

"There is a tremendous momentum behind the peace movement if it can only be harnessed. It will not be known how successful the congress was till we see how seriously the delegates set to work when they return."

Would Like Civic Flag

Mayor Of Vancouver Thinks Every City Should Have One

Vancouver may have its own civic flag in the near future. A letter received from England said Rev. A. Lombardini, rector of the lord mayor's church in London, wished a Canadian flag to hang in his church and hoped one would be presented to Sir Percy Vincent during his recent visit to Vancouver. As Canada has no national flag one alderman suggested a scroll, containing the British Columbia coat of arms, be sent, but Mayor G. C. McGeer said this could not be considered as a national emblem. "Really, we should have a Canadian flag, provincial flags and ensigns for all leading cities in the Dominion," the mayor said. "Other cities have their flags; why should not we have one too?"

Irrigating More Land

A pumping project that will place 2,500 acres of dry land under irrigation, has been put into operation five miles north of Brooks, Alberta. The pump is capable of lifting 10,000 gallons of water per minute into the main distributary canal. New settlers who have taken up farms in this area have already ploughed considerable acreage and are preparing ditches to receive the first application of water.

Ancient Rock Carvings On Vancouver Island Are Puzzle To Archaeologists

Mystery shrouding the origin of two ancient petroglyphs 15 miles west of Victoria, B.C., still continues to baffle archaeologists. One is in the form of a whale, the other resembles some strange monster of the deep, not unlike descriptions given of Amy Cadborosaurus, the sportive sea serpent so often "seen" around the end of Vancouver Island. Large numbers of yachtsmen visited the strange carvings this year; just because of rough water and poor anchorage, few got close enough to examine them thoroughly.

The petroglyphs are located at the northern extremity of Becher bay, named by Capt. Henry Kellett, R.N., of H.M.S. Herald, when surveying the coast in 1846. Indians long ago named the bay Chuchwaetsin, literally meaning "calm water."

Wolf, Lamb and Cub Islands in Becher Bay carry many traces of a large Indian population in tile vicinity long before Spaniards first landed on Vancouver Island at Nootka. Above the beach are eight strokes on a protected concave surface of rock, done in some red substance resembling Indian dye. They are six inches long and half an inch apart. Natives believe them to be extremely ancient. Secrets of many dyes that kept their brightness for centuries were lost long ago.

According to legends handed down to present-day Indians, their forefathers always considered the petroglyphs a deep mystery. They were also puzzled by finding exquisitely made arrow heads of a variety of stone not native to Vancouver Island. The whole vicinity is dotted with square blocks of basaltic rock with pitted surfaces giving it the appearance of one having boiled in some vast volcanic upheaval.

On a bold-faced bluff of black rock there is a weathered representation of a whale six feet long, and two and one-half feet wide at the middle. Close examination shows its outline at one time had been carved deeply into the rock, but sea, wind and wave wore away the surface until nothing but a faint trace was left. Before being able to photograph the whale it was necessary to reinforce the lines carefully with white chalk.

Experts who have visited the carvings are unanimous in their opinion that they are undoubtedly centuries old, after calculating the length of time necessary to wear down the hard rock. What happened to the race believed to have left similar carvings at a few other spots on Vancouver Island will perhaps remain a mystery forever.

Visitors from famous museums who viewed the Mitchell and Hepburn stones unearthed many feet underground on the island, are sure the ancient craftsmen who fashioned them also chiselled out the Becher bay petroglyphs. The two stones are well executed human faces showing a distinctly Asiatic cast.

Two faint diagonal lines evenly spaced are carved across the middle of the whale. A deep S-shaped gash shows chisel marks in the middle portion. From the hardness of the rock it seems impossible the carving was made with stone implements, and it is a well known fact the Island Indians used no metal before the coming of Quadra, Vancouver and Cook. The whale has no sign of an eye.

Three hundred feet from the whale on a large round boulder is a strange carving that reminds one of a sea serpent. It is 12 feet long from nose to tip of its tail. The monster has four bands around its neck, a pendant jaw with large teeth, a large eye and two strange protruberances upon its head.

Indians encountered by Capt. George Vancouver in 1792 had a weird legend about Iakim, a sea monster believed to have existed long before their forefathers. The carving may be some ancient artisan's idea of Iakim. Both the whale and the serpent are protected by a Historic Objects Preservation Act brass plate.

Phrenologist Picks Good Cooks

Phrenology was used to select chefs for a boarding house near Sydney, Australia. The proprietess called in a phrenologist to read the "bump of cooking" of 50 applicants and report on their character. The scientist selected two and the proprietress declares the selections have proved most satisfactory and the method is the only one to use in choosing help.

Igloo, constant companion of Admiral Byrd, was the only dog that ever travelled to both of the earth's poles.

Weed Seed Collections

Hints For Laboratory Workers And Others Interested In This Study

Students of agriculture and botany, laboratory workers, and others who make collections of weed seeds in the course of their work or studies have been busy making preparations at this time when plants are mature and the seeds ripe. However, the interest in this work extends to many individuals who make a hobby of weed seed collections, and for those who are not at the moment in close touch with the latest developments in the art, R. F. Forward of the Calgary Seed Laboratory, Dominion Department of Agriculture, offers a few interesting hints.

Small cotton sacks or paper sacks may be used to collect the seed in the field. Seed may be pulled directly from the plant or the entire plant may be collected to avoid any loss of seed. When plants are procured, they should be allowed to dry thoroughly so as to make threshing as easy as possible.

To thresh the seed, place the plant in a factory cotton sack. Flay with a round stick on a hard surface, preferably bricks, to remove the hulls. Thin hulls on seeds like Wild Oats are best removed by rubbing between the hands. Seeds of the Compositae like Dandelion do not require threshing. Hand seed sieves or the small clipper machines are very satisfactory for removing hulls and chaff after the seed has been flayed. The size of the mesh will depend on the size of the seed.

For collections, seed should be placed in small bottles or vials four drams in size. Label each vial with the common and the scientific name. For mountings, specially prepared boxes with brass clasps may be obtained. However, a homemade box could be made very simply. Secure a thick cardboard box and place vials in box half inch apart. Rows of vials may be one inch apart. The vials are fastened to the box with thread or strips of adhesive paper. Arrange the vials in collection according to families.

Liked Chinese Dish

Present King Once Complimented Cook On Chop Suey

Working as a rush-hour cook in a downtown Toronto restaurant, where meals start at 25 cents, is a Chinese chef whose chop suey King Edward, then Prince of Wales, pronounced "lovely, wonderful."

"Prince like my chop suey so well he ask Lady Lougheed to call me into conservatory—very magnificent place, all beautiful flowers and gold-fish—and say: 'Chin, that was a wonderful dish. Please have it next time I come.'

"He not act like prince at all. He talk quick, he act quick, but he talk to everyone, just like plain man," was Chin Ping Yen's description of King Edward, whose dinner he prepared when the then Prince of Wales was luncheon guest at the home of Sir James and Lady Lougheed of Calgary in 1922.

Lady Lougheed had asked him not to serve turkey or some item of food which was placed before the prince everywhere he went.

"Her ladyship tell me to serve something different, so I make chop suey of chicken and bamboo sliced very fine. I make it to suit my own fancy, with maybe 20 different Chinese stuff. I can't remember now all I put in but prince like it much," said Chin Ping Yen, who said he was 38 "counted Chinese", but 57 according to English reckoning.

Bright Future For West

Western Canada's progress toward complete economic recovery was far from being retarded by the recent drought, J. M. Davidson, of Winnipeg, secretary of the Industrial Development Board of Winnipeg, said in an interview at Montreal. The west, he predicted, was slated for a period of growth that will surpass anything it has experienced in the last 10 years.

Would Draw Heavy Fine

Boys and girls under 18 have been forbidden to smoke in restaurants, cafes, parks, streets and other public places in Mecklenberg, Germany. The police decree ordering the ban declares that offenders are liable to be sent to prison for two weeks or fined $62.50.

One of the longest canals in the world runs from Leningrad to the frontier of China. A distance of 4,000 miles.

"Well, that's the last time SHE puts the car away!"
—Der Lustige Sachse, Leipzig.

Railways Increase Business

Gratifying Increase In Passenger Traffic Is Seen

The importance of the sleeping and dining car services of the railways of today was the subject of an address by A. A. Gardiner, assistant general traffic manager of the Canadian National Railways, delivered before the annual convention of the American Association of Superintendents of Dining Cars at Toronto.

The speaker stressed the fact that with the gratifying increase in passenger traffic the problem of numerous travellers who were not accustomed to train travel had assumed an entirely new significance and that it lay within the power of the sleeping and dining car staffs either to promote or discourage this new type of business.

Drawing attention to the fact that recent passenger fare legislation, both in Canada and the United States, had not only popularized rail travel but had emphasized the superiority of the accommodation offered, Mr. Gardiner intimated that the railway's campaign to make travellers "train-conscious" was increasingly successful and that he was proud to say the train crew were putting forth every effort to assist the passenger departments retain the new traffic secured.

Noisy People Classified

Doctor Claims They Are Imbeciles Of First Order

The auto driver who toots his horn unnecessarily to show his displeasure when delayed in traffic is an imbecile of the first order, Dr. Clarence A. Neymann, professor of psychiatry at Northwestern University, told the City Club.

Declaring noise is produced unnecessarily only by morons, imbeciles and idiots, he proposed a new medical campaign slogan: "Be an imbecile and you can be noisy". Many persons of low intellect are purposely noisy, he said, so that they may impress their presence on those whom they deem their superiors and thus irritate them. This helps them feel important and aids them in overcoming their inferiority feeling.

A Modern World Pestilence

Death Toll On Highways Not Receiving Much Attention

The plagues and pestilences that harried the world's population in other centuries have disappeared before the advance of medical science and sanitation. Unfortunately in the first third of this century their places have been taken by a new form of mortality—death on the highway.

There is even less reason for this than there was for the old diseases which once decimated cities. When nations were faced with typhoid fever and diphtheria scourges, scientists and municipal authorities joined hands to drive them out and so determined was the campaign that today the number of cases and deaths from either cause is negligible.

Why cannot the same forces, aided by public opinion, put an end to the terrible death toll from automobile accidents?—Toronto Telegram.

Defies All Scourges

U.S. Men Claim They Have Developed New Forage Crop

Ellsbery O'Hair, employee in the Illinois State Department of Agriculture, claimed that he and his father, H. Z. O'Hair of Bushton, Ill., had succeeded in growing a grain and forage crop which defies drought, heat, grasshoppers and chinchbugs.

He said it was the first time that the crop, a hybrid of three cross pollenations of varieties of haffir corn and ribbon cane, had been grown in the midwestern corn belt.

The test was conducted in co-operation with Fred Groff, Oklahoma experimental farmer.

The two outermost moons of the planet Jupiter do not move around it from east to west, as do its other moons, but from north to south, and south to north.

Horses are the cheapest form of transportation over distances up to three miles, a British expert calculates.

There are eight thousand milk delivery routes in New York City.

An Exclusive Alice Brooks Design

Household Arts by Alice Brooks

Quickly Crocheted Squares Make a Handsome Rug

PATTERN 5699

Just a simple square, repeated and joined together forms this smart rug. You'll love doing the colorful squares in varied colors, and, in no time at all, you'll have enough completed to make this stunning rug. Here's one way to turn useless rags into something worthwhile, though rug wool or candlewicking may also be used. Done in Germantown the squares would make a handsome cushion or chair set. In pattern 5699 you will find complete instructions and charts for making the square shown; an illustration of it and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg.

There is no Alice Brooks pattern book published

Indian Lore That Created A Name For The Key Province Of Canadian West

A Stubborn Enemy

Work And Patience Required To Get Rid Of Mustard

Owing to the great vitality of the seed, mustard is a very hard weed to eradicate. The seeds, once in the ground, live for years. Hence it takes patience, a great deal of labor, and a long time to get rid of the weed when it once gets possession of the land. When present only in small amounts, hand-pulling is the best method, providing the pulling is done before seeds have formed and as persons pulling in a hurry cannot wait to examine for seed, it is best to put the weeds, as they are pulled, in bundles where they can be burned when dry.

Iron sulphate or copperas can be successfully used to destroy mustard in standing grain without injury to the crop. A 20 per cent. solution should be applied. This can be prepared by dissolving eighty pounds of iron sulphate in 40 gallons of water. Iron sulphate is dissolved quite readily in cold water. The solution should be strained through a cheese cloth, as it is put into the spray pump tank. This will remove dirt and small particles that are apt to clog the nozzles.

Apply on a calm, clear day, just as soon as the first few plants in the fields show flowers. It is very important to spray early. If the plants are left too long the treatment is not nearly as effective. If a heavy rain comes within twenty-four hours after the solution is applied, it will be necessary to spray again. An ordinary hand pump barrel sprayer, such as is employed to spray fruit trees, may be used, or a potato sprayer can be rigged up to do the work. Many of the up-to-date sprayers have a special broadcast attachment for spraying weeds. These are excellent for large areas, as they cover a wide strip at each round. Care must be taken to see that every mustard plant is covered with the solution in the form of a fine spray.

Cooking Must Be Done

People Will Never Live On Concentrated Food Pills

Alack and alas, the hard-working housewife must give up her dream of dispensing with a four-course meal by simply feeding hubby a concentrated food pill—it can't be done, an authority said.

The calory factor will necessitate continued operation of kitchen, explained Dr. Milton A. Bridges, assistant clinical professor of medicine at Columbia University and dietics authority.

"Human beings never are going to eat pills for meals," said Dr. Bridges, emphatically. "Pills can never be made to contain sufficient calorie volume."

It is preferably plausible to supply all the vitamins and minerals needed for a meal in pill form. But you can't get calories except by eating foods.

Scourge Of Nagging

Wears Down The Nerves And Is A Menace To Health

Husbands with nagging wives should call the latter's attention to the comment by the Manchester Sunday Chronicle on the report of the Medical Research Council which would indicate that persons can be literally nagged to death. The Sunday Chronicle observes:

"Resistance to disease sinks when nagging wears down the nerves. This is news to the unfortunate people who have suffered under the scourge of a nagging tongue. An intelligent argument is a stimulant. But the senseless wrangling that is all too frequently a part of our private lives is a menace that spares neither the arguer nor the argued.—Kitchener Record.

Eskimo Learns Quickly

After a week in hospital at Halifax, Inuwkshoo, an Eskimo brought from the sub-Arctic on the Hudson Bay Company's steamship Nascopie, could count to 10—and play cards. Fellow patients taught Inuwkshoo, who didn't know a word of English on his arrival. Now, although his knowledge of the language is slight, he greets visitors with a cheery "Hiyah."

Encased in a block of ice 40 prize dahlias from the National Dahlia Society show will be shipped from London to Newcastle, Australia, for display next March.

Waters still ebb and flow in the straits off Manitoba Island, 15 miles north of The Narrows. Lake Manitoba's sacred temple of Indian tradition is now a quiet rural community but when black shadows fall in the forests the island again becomes the haunt of Manitou.

The march of civilization has not removed it from the place of Indian mythology that created a name for the key province of the western prairies. Virgin woodlands and streams that border the lake have charged little since Pierre Gaultier de Varennes, Sieur de la Verandrye and his son first glimpsed them 146 years ago.

Indian tribes crossed the half-mile strip of water at this point centuries ago to make raids on more peaceful bands. Here, also, they met to smoke the pipe of peace and pay tribute to the Great Spirit. Tribes of Cree, Ojibways and Sauiteaux believed their Manitou lived on the island to the north.

They called the place Manitowapah —a contraction of Manitou, from the island-dwelling place of their spirit, and Wapah, meaning Narrows (the spirit of the Narrows). Because of conflicting sound the white man, according to early authorities, curtailed it to Manitoba.

History of the name dates back centuries when only the Red Man roamed the lake shores. It was believed a weird sound caused by the rapid current passing over the shingly, limestone rocks on the shore of the island was the voice of the Great Spirit.

When the south wind blows waters in the Narrows rise more than four feet. The receding tide makes a rushing noise which can be heard for long distances. The district came to be a sacred place for various tribes who gathered there for ancient ceremonies, war dances and feasts.

Present-day Indians have already embraced the Christian faith but pagan beliefs and superstitions die hard. Older natives have been seen to throw pieces of tobacco into the water while passing the island as an offering to the Great Spirit.

An example of the extent to which superstition clings is furnished by Hebron Moar, pioneer postmaster of The Narrows' community. When a Hudson's Bay steamer travelling down the northern shore of the lake was berthed at the entrance to the straits, Alexis, old Indian member of the crew, was asked to appeal to Manitou for a fair wind.

The native did so in a dramatic manner, Mr. Moar relates, throwing the usual offering on the waters. Immediately the surface rippled. A faint puff of wind became a steady breeze that filled the sails and carried the vessel on to its destination.

Trade With Britain

British Empire Is Best Customer Of United States

Evidence the British Empire is still the best customer of the United States was presented by the U.S. chamber of commerce in an analysis of foreign trade for the first half of this year.

The empire absorbed 41 per cent. of all American exports during that period, and at the same time supplied 35 per cent. of all foreign goods shipped into the United States.

The United Kingdom bought $187,872,000 worth of goods from American producers, lifting its purchases 17 per cent. above the comparable period last year.

Canada was the second heaviest buyer, taking 15 per cent. more than in 1935. Its purchases totalled $182,773,000.

Man's Word Is Good

Paddy Carver, whose worldly goods were destroyed in the foundering of the freighter Avon River in Hudson Bay, doesn't contemplate any difficulty in reaching an insurance settlement. "In the southern part of Ireland a man's word is always taken," said Paddy when commenting on a $10 claim he intends to register. "To doubt it would be the highest insult."

Carrier Pigeon Saved Lives

A carrier pigeon at Fukuoka, Japan, is credited with saving 130 lives. A small wood fire ran down a storm which threatened to sink it. Without wireless, it was unable to call for help until a passenger, Risakure Iabibashi, released his pigeon with a request for aid.

The palm or coconut crab lives almost entirely on coconuts. The creature is a native of the East Indies.

TOWN OF REDCLIFF

The Local Tax Arrears Consolidation Act

The Council of the Town of Redcliff has passed a By-law declaring that the above Act will be applicable to the Town of Redcliff and said By-law has been approved by the Minister of Municipal Affairs in writing.

All consolidated arrears of taxes shall under this Act be payable by five equal annual installments together with the current taxes on or before the 15th. day of December except as hereinafter mentioned

The following persons may make application to the Council to come under the provisions of the above Act.

Any person, firm or corporation who is the owner of any parcel of land in the Town of Redcliff, against the title of which, there is a subsisting notification for arrears under "The Tax Recovery Act 1929.

Any person who has been a bona fide resident of the Town of Redcliff for 12 months immediately preceding the date of his application, in the case of lands which have been finally acquired by the town of Redcliff but not sold, or such persons personal representative.

In such cases where the applicant's property is to be exposed for sale at the forthcoming Tax Sale on August 22nd., 1936. such applicants should make their applications in time for the Council to consider same previous to that date.

Upon receipt of the application, the Secretary Treasurer shall calculate the amount required to pay the arrears of taxes, if the same were consolidated, and the applicant shall deposit with the Secretary Treasurer one fifth of such sum.

In such cases where the application to consolidate is made after the 15th day of November 1936, the applicant shall also deposit with the Secretary Treasurer sufficient to pay the current year's taxes.

In any event the current year's taxes shall be paid by the applicant on or before the 15th. day of December.

When the application is granted, the deposit shall be applied on the applicant's consolidated arrears, otherwise it shall be repaid to him.

In case the application is not granted, provision is made in said Act for an appeal to the Minister of Municipal Affairs.

The Council may, on the applications in writing of any person liable under a consolidated agreement under this Act and with the approval of the Minister, by resolution, extend that agreement for one year and allow payment of the instalment payable under the agreement for any one year of the years for which such agreement is made. In case it is thought proper so to do by reason of crop failure or other circumstances.

No buildings, fences, fixtures or other improvements shall be removed from any land in respect to which there is a subsisting tax consolidation agreement.

To those who properly come under the provisions of the above Act, all proceedings under the Tax Recovery Act 1929 are suspended in respect to the properties involved while such consolidation agreement is in force.

Hard to Fit?

HAVE you experienced difficulty in securing a dress to fit you properly? Do you find the dresses you order a little tight in the hips, a bit narrow across the shoulders or short in the sleeves? Do you find it hard to decide what type of foundation garment you require?

If these are your problems, then your figure probably is a little different from the average type. You are the type who should measure yourself very carefully or, better still, you should have somebody else do it for you. Never be satisfied to order the same size you had last time. Measure and make sure of the size you wear every time you order.

Why not write to EATON'S Stylist Service, enclosing your measurements, and I will be glad to advise you regarding your requirements. However, you must remember that I am not a Shopper and act solely in an advisory capacity.

YOU Share In Canada's Greatest Co-Operative Business

LIFE INSURANCE is the greatest co-operative business in Canada. As a policyholder, YOU are associated with more than 3,500,000 other Canadians in this great enterprise.

Every business day last year Life Insurance Companies in Canada distributed, to Canadian policyholders and beneficiaries, over Half a Million Dollars.

Life Insurance enables YOU to provide financial security for yourself and family. It also benefits the country as a whole through the investment of Life Insurance funds in important public enterprises.

Life Insurance dollars give employment to workers throughout the Dominion. Transportation facilities are extended, highways built, streets paved, schools erected, water, sewage and other necessary works constructed. Life Insurance dollars help to finance the farmer, and bring business to the general store and country merchant.

In the past five years of business depression, Canadian policyholders and beneficiaries received over Eight Hundred Million Dollars in payments from their Life Insurance funds. Life Insurance Companies have fulfilled every obligation one hundred cents on the dollar.

As a policyholder, YOU can take justifiable pride in sharing in this, the greatest co-operative business in Canada.

Canada's Wild Birds

Game Birds Being Depleted By Drouth And Toll Taken By Hunters

Canada has about five hundred species of wild birds. Not all these birds can be seen at any one time or in any one place in Canada or, in fact, anywhere else. Some are sea birds, rarely seen far from salt water, some are denizens of the deep forest, while others frequent open prairies, marsh or meadow, according to their natural requirements. Many are just birds of passage through much of Canada, nesting in the high north, wintering in the near or far south from just below the International boundary to the humid tropics.

Canada values her bird travellers and to protect those which spend a part of the year in Canada and a part of the year in the United States the two countries entered into a treaty almost 20 years ago, uniting in co-operation extends protection to migratory birds by means of close seasons, bag limits and the prohibition of unfair hunting methods. The birds do not belong to either country, they belong to both. Perhaps eighty per cent. of the wild duck supply of the North American Continent is produced in the Prairie Provinces and vicinity. From this great waterfowl hatchery the continental supply migrates fan-wise until it reaches the Pacific, the Gulf of Mexico, and the Atlantic.

Most of the birds which are protected throughout Canada and the United States by the Migratory Birds Treaty are not under any major attack from man. The game birds, on the other hand, have had to meet an ever increasing demand from the hunters and many kinds of them have become seriously depleted. Firearms have improved and better roads let hunters reach the hunting grounds more easily. The marsh areas which the waterfowl frequent have been reduced by drainage or other causes until these birds have been often in a serious plight. Natural causes, among the most serious of them drought, as well as man's demands, have depleted the supply of water birds.

Almost A Century Old

Euston Station To Be Replaced By Modern Terminus

Many Canadians, who have entered old London by Euston station, will be interested in the report that it is to be demolished to make room for a modern terminus. It is a year short of a century since Euston was opened by the Glasgow Herald. When the railway stretched as far as Boxmoor. Directors and their friends made the first journey. Unfortunately, when the train was steaming into Euston after a successful trip to Boxmoor, the brakeman turned the brake the wrong way, and the engine collided with the end of the platform. All in the train were badly shaken, and some were injured. It was an unlucky baptism for the new station, but directors and staff were undismayed. In 1837 six trains a day (three outward and three inward) were started to the sound of bugles. The longest distance through-train ever run in Britain was the famous "Jellicoe Express", which ran every week-day during the war from Euston to Thurso—717 miles. It took 22 hours to make the trip, and it was the first British train to have padlocked cell carriages for prisoners, such as deserters and spies.

No Danger From Mice

Rodents Will Not Touch Grain Treated With Chemicals

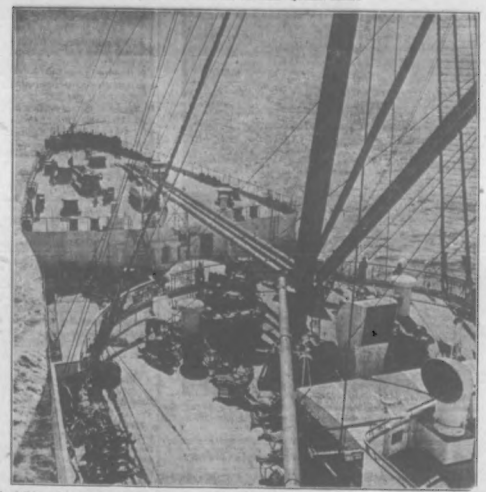
Seed grains, treated with dust chemicals for the prevention of seed-borne diseases such as smut, can be safely stored for six weeks or more without danger from mice, according to experiments worked out by L. H. Newman, in Canada. This means that you can do this work well in advance of seeding time and have the seed ready for planting. Mice will not touch seed treated with the chemicals now on the market. Naturally, it will not be healthy for your hens or other livestock to eat the poisoned seed.—Country Home.

China Wants Policewomen

Shanghai is trying to enroll forty Chinese policewomen who belong in the higher intelligence brackets. Candidates must be 4 feet 5 inches in height, between 18 and 30 years of age, and graduates of a junior high school. They are given examination in history, mathematics, geography and science. The pay is $3.25 a month during training and $6 after graduation.

In 1659, Sweden issued a copper coin weighing 31 pounds and measuring 2 feet by 1 foot. The coin was worth about $5.20.

FROM THE BRIDGE OF THE "QUEEN MARY"



A striking picture taken from the bridge of the world's great liner, as she set a course due west from Southampton for New York.

There Was A Reason

Why Small Church In Scotland Had Big Congregation

You may wean a Scot from his haggis, and there are, it is affirmed, expatriates from the land which lies north of the Tweed who follow after the strange customs of the aliens among whom they dwell to the extent of spoiling their parritch by putting sugar on it. But you shall not stop a true son of Caledonia from gaein' tae the kirk.

Not even what an Associated Press dispatch calls "wet weather and a piercing, cold wind" can keep him away. Or, at any rate, it didn't one Sunday when the little minister of the tiny church at Crailhie, Balmoral, preached to a congregation that, in numbers, resembled the eager crowds in Edinburgh in the sixteenth century that defied worse than weather to applaud stern John Knox as he wrathfully and roundly scolded Mary Queen of Scots. The gathering around the Crailhie church was so great that the local police were quite flustered trying to untangle a seven-mile traffic jam.

King Edward was there, too.—Christian Science Monitor.

Easy To Believe

Before an eminent judge of the Scottish Bench a counsel once urged on behalf of a plaintiff of somewhat bibulous appearance:

"My client, my lord, is a most remarkable man, and holds a very responsible position; he is manager of some waterworks."

"Yes," said the judge, "he looks like a man who could be trusted with any amount of water!"

According to Chinese tradition, use of cloth was evolved from the practice of women carrying their children in fibre nets.

The Queen Mary, newest trans-Atlantic liner, has 12 decks, of which the main deck is 750 feet long.

Salt For Chickens

One Per Cent. In Ration Usually Found Enough

Poultrymen have known that a little salt in a ration was beneficial but that too much was just too bad—the chickens died. University of Wisconsin investigators made some tests recently to find out just how much salt was good for a chicken. It was learned that five per cent. salt in a ration slowed down growth, resulted in poorer egg production, and caused an abnormal amount of water to be consumed. Two per cent. salt was not injurious, but it also resulted in abnormal water consumption, causing wet litter. It seemed to be advantageous to have one per cent. salt in the ration, except when meat scrap and dried milk are fed; then one-half of one per cent. was ample for both growing and laying stock.—Country Home.

World's Largest Tea Party

Queer Mixture Used At Annual Tibetan Prayer Festival

The world's biggest tea party is that which takes place at the annual Tibetan prayer festival. A huge brass cauldron is rigged up in the main square of Lhasa, capital of Tibet, and the tea is prepared. It is made by churning up brick tea, soda, salt and plenty of butter or rancid mutton fat. The older the butter the better! The result of the mixing is a dark brown oily liquid, and Tibetans regard it as the greatest drink in existence. It is quite an ordinary thing for a man or woman to drink about 60 cups of it in a day. And the extraordinary thing is that it seems to do them good. Tibetans are endowed with almost incredible muscular strength and amazing power of endurance.

More than 900,000 square miles, or 28 per cent. of the area of Canada, exclusive of the Arctic islands, is still unexplored.

Qualified For Business

Statistician Thinks Women Are Often Better Than Men

Roger W. Babson, business statistician, suggested there would be fewer business failures and unhappy marriages if sister took over the family business instead of brother. Babson, attending the 23rd annual national business conference in Wellesley, Mass., said:

"The principal cause of the broken families and bankrupt business is the attempt to keep a woman in the homes and men in commerce. As many young woman as young men are qualified for business. But we have not arrived at the point of intelligence where we will accept the scientific fact of heredity and biology. There is no difference between the sexes.

"How many times do sons fail in business that their fathers handed down to them in good condition?" Their sisters might have made a success of it. The sister marries and does not make a success of her domestic duties because she does not inherit the domestic traits from her ancestors."

Travelling Post Offices

Britain Trying Experiment At Race Meetings And Cattle Shows

The British post office is experimenting with mobile post offices. The offices, about the size of a motorbus, are drawn by specially designed tractors to race meetings, cattle shows, and similar gatherings. Each has two telephone booths at the rear, from which calls may be made to any part of Britain or overseas. Telegraph installations enable messages to be sent all over the world. There are the usual posting facilities for letters, with frequent collective service.

Peeled apples can be kept by immersing in salt water until used.

ITALY'S BIGGEST MILITARY AERODROME

The aerodrome, whith covers about 296 acres, was constructed in 14 months and has great aircraft sheds and splendid accommodation for officers and men. Part of the buildings are seen in our picture during the march past before Premier Mussolini, who opened the aerodrome recently.

Canada's Tree Trade

United States Still Imports Large Number For Christmas

We are living in a highly competitive age; no sooner does someone discover a profitable business connection or line of trade than someone else steps in to do battle with him for it. A proverb of the Victorian age used to say that competition was the life of trade but it is hard to see how the modern kind of competition is particularly life-giving.

An example is drawn to our attention by Mr. G. A. Newman, Assistant Trade Commissioner in New York, who in a report to the Commercial Intelligence Journal, speaking of Christmas trade—for which it is not too soon to prepare—states that there is an increased sale of potted trees and rather costly artificial trees in the Eastern United States where once the natural Canadian tree held sway; domestic supplies being irregular and limited by embargos on pest-infected areas.

In spite of this condition, Mr. Newman adds, however, there is still a regular seasonal demand for trees cut in the provinces of Quebec, New Brunswick and Nova Scotia; established dealers in the trade sending representatives to the various producing areas, as a rule, in the summer and autumn to contract for supplies. And just how extensive the trade has become may be seen from the fact that 3,573,642 Canadian Christmas trees, valued at $564,135, were imported into the United States last year, as against 3,681,439 trees, valued at $373,286 in 1934.

The trees thus imported are said to be in market in most of the large American cities of the East that may be reached without prohibitive freight charges. New York, as one would expect, is the main consuming centre; taking annually from 400 to 425 cars of from 1,500 to 2,000 trees; while Boston, Philadelphia, Detroit, Pittsburgh and other points account for somewhat smaller quantities.—Quebec Chronicle-Telegraph.

Gas In Canisters

Special Kind Shipped From Glasgow To The Hebrides

Gas is being conveyed to the farm homes of the remote parts of Scotland, even out on the islands of the Hebrides, in canisters. The gas, which is of a special kind, is made in Glasgow and shipped to homes on the islands of Skye and Mull, the crofts of Argyllshire and the Highlands, where for generations they have known nothing except the most primitive illumination, and no other heating and cooking appliances except wood or peat fires.

The new illuminating and heating mixture is called butane, and it will put the rural people on the same footing as many people in the big cities. One canister will give light by a gas mantle for over four hundred hours. Cookers with several burners are able to supply all the heat necessary for continuous work for several days. A gas fire can be kept going for more than a hundred hours at full pressure, and one of the advantages is that the gas can be controlled just in the same way as ordinary gas on any company's apparatus.—St. Thomas Times-Journal.

Offensive Advertising

U.S. Government Thinks Liquor Advertisement No Place For Girl's Picture

Only two distillers out of hundreds defied the U.S. Federal Government's edict that a liquor advertisement is no place for the picture of a pretty girl lapping up a cocktail.

There is no law against such display of feminine thirst, but the Federal Alcohol Administration thinks maybe the buyers of whisky aren't much interested. It thinks also that the prohibitionists have a legitimate kick when they see a limey-looking blond staring at them from billboards and street car signs and magazine ads.

An Unpublished Photograph

Queen Mary locked out, for the moment, at Jervaulx Abbey while on a visit would not be at all upset, having plenty of sang-froid. Her Majesty never expects preferential treatment merely because she is Queen, nor is her balance easily upset. Once she was photographed in a rather insolent fashion at a public affair. All she said was: "I think someone has taken a photograph, but before it is published it must be submitted." It was never published.

There's only one way to retire—that's to retire in time every night to get up early to go to work again.

Whales have the largest brains of all mammals, the largest on record weighing 7,000 grams. 2173

Spreading Scientific Farm Knowledge

Encouraging Up-To-Date Methods Of Husbandry On Canadian Farms

With a view to spreading scientific farm knowledge and encouraging up-to-date methods of husbandry on Canadian farms, the Federal Department of Agriculture has established 223 illustration stations throughout the Dominion. Each is regarded as a community development project and stands as a unit for helpfulness in its neighborhood. It also serves as a connecting link between the experimental farm and the farmers of the various districts.

The first essential of an illustration station is to develop a crop improvement program by creating a rotation adapted to the district, and to provide feed for the animals on the farm. Next, the breeding phase of the work is developed, including the use of pure-bred qualified sires, as well as the weeding out of low producers by the use of dairy records. On an illustration station the objective is not only to develop an improved herd for the monetary benefit of the farmer on whose farm the station has been established, but eventually to create a source from which neighbors may obtain breeding stock. In poultry a concerted effort has been made to arouse greater interest in the proper housing, feeding, and development of the flocks. Special attention has been directed to developing the stations as seed-producing centres.

While illustration stations are primarily concerned with problems relating to crop and livestock production, the possibility of developing and maintaining attractive home surroundings and adequate buildings is given due consideration. Shelter belts, hedges, shrubbery, lawns, perennial and annual flower borders are being steadily developed, and building plans for new homes, barns, and out-buildings are discussed with operators as required.

An Indian Rainmaker

Medicine Man Brings Showers In Exchange For Tobacco

Magician and medicine man, old "Frederick," native of Montreal Lake Indian reserve, may be the answer to the North Central American farmer's prayers. He will guarantee rain in copious quantities in exchange for a plug of tobacco.

Better known as Wee-Tee-Go, or Muscus, Frederick has been making the elements do his bidding for some time, according to local records. For proof of his success he points to a never-failing source of the nicotine leaf.

For a plug of tobacco the 80-year-old Indian will work up a moderate shower. For five plugs he will conjure up a soaking downpour. Unlike Charles M. Hatfield, Alberta rainmaker who induced rain to fall near Medicine Hat in 1911, Frederick has never disclosed his methods to those outside the "trade."

When forest fires raged in the area, 60 miles north of Prince Albert, last June, T. Ingram, of the Saskatchewan natural resources department, arrived at Montreal Lake in an airplane piloted by Nick Carter. There was a clear sky and rain was sorely needed. Frederick, it is related, came through.

The aged rainmaker received his tobacco and within 24 hours rain fell. All but one of a number of deeply-rooted muskeg fires were effectively put out. Frederick lamented the fact that one plug had to be divided with three other agents in his "business."

Waterspouts Dangerous

Tremendous Weight Has Damaged Even Large Ocean Liners

Contrary to popular belief, waterspouts are formed from fresh water, condensed from the atmosphere by the rapid whirling motion of the tornado-like clouds. A waterspout is very dangerous to fishing boats and other small craft. Cases are on record where large ocean liners have been forced to limp into port, their plates battered from conflict with a waterspout. The danger of running into a spout lies in the fact that contact with the moving column of water is likely to shatter it so that its tremendous weight crashes on the deck. Waterspouts occur in widely distributed parts of the globe. They are also observed frequently on large inland bodies of water such as the Great Lakes.

To prevent needles and pins from rusting, stick them into a piece of flannel which has been saturated with machine oil.

The fastest thing a human being can do is wink an eye. That takes an average of one-tenth second.

WORLD HAPPENINGS BRIEFLY TOLD

The king will hold a great review for ex-service men during the coronation period next spring.

Appointment of D. D. D. Murphy as assistant inspector of civil aviation at Carcross, Yukon territory, has been announced.

Simontown's coronation gift to the king will take the form of a King Edward coronation playing field area and recreation for the youth of that South African naval port.

Russia was now offering a possible market for upwards of 100,000 head of Canadian cattle a year; G. G. Serkau, Montreal trader, said in an interview at Calgary.

The monetary unit of the conquered Ethiopian kingdom — the Maria Teresa thaler—was established as the legal currency by cabinet decree, after having been abolished in a Rome edict last July.

Establishment of a training school where boys and girls might be taught a trade was advocated by speakers at a public hearing held by the royal commission investigating penal institutions in Canada.

Navigation of all kinds was closed for the season at Churchill, the Hudson Bay port on Oct. 13, following departure of 75 members of crews of harbor and coastal boats. All vessels have been taken out of the water onto the slipways.

Lady Emma Morrison, 60, and widow of Major-General Sir Edward Morrison, died at her home at Ottawa after a prolonged illness. Native of New Orleans, she was married to Sir Edward Morrison, of the Canadian artillery, in 1911.

Part Of National Life

Democracy Has Been Accepted In Britain For Two Centuries

It was fashionable a few years ago to speak of democracy as being "on trial". In many countries it is no longer on trial, but has been condemned and executed. In this country it is not, and never was (at any rate for the past couple of hundred years) on trial; it is part and parcel of our national life, and something which it behoves us to regard as no less permanent than Herr Hitler's "thousand-year regime." If anything is on trial it is rather dictatorship, for we have still to see what happens to it when the day comes to find the successors of the men whose personality had laid its stamp upon their creations. No country can depend on a perpetual supply of Hitlers and Mussolinis. In their default, will anybody care to say that dictatorship, relying as it does upon a very inflexible principle of personal leadership, is likely to prove any more stable than democracy?—London Morning Post.

Lighthouse Guides Motorists

A lighthouse to guide motorists approaching Leipzig, Germany, has been erected. Set up on one of the main highroads, it has glass walls illuminated at night so that directions and distances inscribed thereon may be read from afar. Illuminated indicators have been placed at other crossroads commanding approaches to Leipzig.

If Australia could be placed in the Atlantic ocean, it would fill all the space between the United States and Great Britain.

Industrial output is falling off in Chile.

MOTHERS FEEL SAFER
One Mother writes: "With a family of children constantly getting scratches, cuts, or bruises, I have proved Mecca an invaluable healer. I remind prove to you highly. I keep a tin of Mecca ointment and another downstairs." 62
MECCA OINTMENT

An Enthusiastic Veteran

Lord Baden-Powell Works Hard For Boy Scout Cause

The veteran in youth movements, Lord Baden-Powell, ably backed by Lady Baden-Powell, who is as keen on the Girl Guides as her husband is on the Boy Scouts, is indefatigable in his efforts for the cause. He went to Scotland to open the Aberdeen Scouts' new luxury camping ground at Templars' Park, Maryculter. With his encouragement, the boys have worked hard to make Maryculter House look very much as it did in the twelfth century, when it was inhabited by the Knights Templars who daily did their "good turns." The grey and red colors of the Knights Templars have been reproduced in the scheme, and the interior has been decorated so far as may be in true medieval style.

The Chief Scout is anxious, too, that all boys possible shall pass the necessary tests for the King's Scout Badge in time for the Coronation, because scouts are to sell the Coronation program prepared by King George's Jubilee Trust Fund.

Safety For Miners

Science Has Instruments To Detect Threatened Cave-In

Scientific ears, mechanical thermometers and giant stethoscopes will feel the pulse of mother earth in the future and give miners advance warning of impending cave-ins, J. V. Claypool, of Hibbing, Minn., told the National Safety Conference at Atlantic City, N.J.

Claypool, district superintendent of the Oliver Iron Mining Company, said detection of weak spots in the walls and props of mines were rapidly becoming an exact science.

He told of a new "dynamometer prop" that records the earth's pressure against the mine's pillars much in the same manner as a thermometer records temperature. The device is built into one of the ceiling supports, and the slightest increase in pressure from above is recorded by a rise of a mercury column.

Another device utilizes a steel bar, fitted telescopically into a cylinder and held in place by a powerful spring. When set against mine ceilings, compression of the spring is registered by a stylus that traces a line on a drum.

Created Her Own Job

Clever Girl Now Does Buying For Busy Professional Men

A clever girl went about to offices in one city and asked busy professional men if she might bring goods to them in their offices so they could save time in making their selections of socks, ties, shirts, belts, handkerchiefs, etc. She secured all the facts about their needs, such as colors preferred and approximate price they wished to pay.

These men found this girl a good shopper; and with so little exertion they could get the kind of stuff they wanted to wear with their tan suit and the shirt that set it off. She showed them only articles in their own sizes, and she had even the correct shirt sleeve lengths when she brought the shirts for selection. The men found they saved money and much time by this method of shopping.—Christian Science Monitor.

Coming To Canada

Farmers From Czechoslovakia Will Settle Here Next Spring

In Winnipeg to study land settlement possibilities in Western Canada, Adolf Schmidt, secretary of the Central Farmers' Co-operative Association with headquarters in Prague, said 50 families will come to Canada next spring to settle on farms.

If good reports are sent back to Czechoslovakia, Mr. Schmidt said, other settlers will follow. The association has a membership of 10,000. The farmers who will come here next spring, he continued, will have a capital of from $1,000 to $5,000 per family.

Took Long Hike

Residents of Hines Creek, Alta., were still talking of the feat of endurance accomplished by a 78-year-old halfbreed woman. In one day she walked four miles from her home to Hines Creek, continued 20 miles on foot to Fairview and then returned home carrying her groceries on her back. The entire trek was estimated at 25 miles.

Tea compressed into bricks in China, slabs of copper in Sweden, cattle, milk, salt and tobacco, all were used as coinage at one time or another in various lands.

Automobile horns having been outlawed in London, an electric bell signal has been invented to replace them. 2173

ARGOS' VERSATILE UTILITY MAN

Annis Stukus, who has played almost every position for the Argos. He is a natural leader at quarter, works on the end of the line and also on the back-field.

Week-End Drinkers

Chicago Medical Authority Points To Perils Of Chronic Tipplers

Liquor takes its heaviest toll on the "week-end drinkers"—those persons who vary periodic alcoholic sprees with short rides on the "water wagon"—a Chicago medical authority declared at Kansas City.

That type of drinker, said Dr. Joseph C. Capps, professor of medicine at the University of Chicago, courts an eventual "mental breakdown" and suffers "loss of will power and confidence in himself during the process."

These terrors are not so prone to dog the chronic tippler, who instead invites cirrhosis of the liver as the price for his indulgence, said Dr. Capps.

"Our danger is that we're becoming a nation of hard liquor drinkers. Over a period of years this is going to mean a decline in the health and mental integrity of our country," he declared.

"If young people must drink, the sensible thing is to use mild drinks (beer and wines) and keep away from hard liquor."

However, drinking may play a legitimate part in the lives of persons beyond middle age, the doctor said.

"Work recently done by a Boston specialist goes to show that a small amount of spirits late in life tends to preserve the arteries."

Might Be Good Idea

Canadian Critic Thinks Novels Should Be Graded Like Eggs

"Great art never appears in advance of a public able to appreciate it," William Arthur Deacon, well-known Canadian critic, stated in an address at London, Ontario.

"If novels could be graded, like eggs, the reading public might be sure of spending their too-few reading hours with guaranteed articles," Mr. Deacon said. Unfortunately, in the realm of the aesthetic there are no standards and no honest critic can infallibly select literary "eggs" that can be warranted good.

Mr. Deacon impressed on his audience his belief that, as a critic, his opinions were not necessarily better than theirs. But he hoped, he said, to encourage them to increase the joys of their own reading by "attaining a critical attitude towards what they read.

"When novels are pouring from the presses of the English-speaking world at a rate of approximately 20 a day, the most assiduous reader cannot hope to cover more than a small minority of them," the speaker said.

New Broadcasting Stations

The Canadian Radio Commission announced it expected a new 5,000-watt transmitting station at Lulu Island, B.C., and modern studios in the new Canadian National Railways hotel at Vancouver would be ready for operation early this winter. The studios, the commission said, will be the most up-to-date in Canada.

Would Be Great Boon

At last, the silent radio! The receiver of a new model announced is about the size of a large watch and may be placed beneath a pillow on a divan or suspended on the back of a chair, bringing the program only to the person lying on the divan or sitting in the chair.

Britain Accepts Challenge

Race With Russia For Gold Output Has Started

For all of 1936 Soviet Russia is expected to produce about 6,000,000 ounces of gold. And because of its expansion program the Soviet Union is expected to be the world's largest gold producer by 1939. At present South Africa holds the title. British interests say that all of South Africa's mines are going full blast. They hope that by 1939 the gold producing title will be retained.

It is interesting to note that in 1928 the Soviet Union produced only 899,000 ounces of the precious metal. Last year the full output was 5,650,000 ounces. According to informed mining interests the rich deposits of gold ore in Siberia are still virgin territory. The British have accepted the challenge. And so the race for gold output is on.

It's easier to mortgage the home to buy a car than to mortgage the car to buy a home.

The United States imports more than 7,000 quill pens from England every year.

Maker Of Toys Dead

Devised Meccano After Watching Crane In Freight Yard

Frank Hornby, inventor of the Meccano toys and manufacturer of the Hornby toy trains, died at Northern Hospital, Liverpool, after a serious operation at the age of 73.

He founded the Meccano business in one room of a workshop in Liverpool in 1900. Today the factory covers five acres, employs 1,500 persons and made net profits in Great Britain last year of more than £40,000.

A few years ago, when millions of children in Europe and America had played with his toys, some one asked Mr. Hornby how the idea of Meccano came to him. He answered that he was on his way to spend Christmas with relatives and wondered how he could amuse the children.

"The train stopped opposite a freight yard," he said, "and there was a small crane there. It occurred to me that I might make a crane like that with little strips of steel. I chose the name Meccano because people of all nations can pronounce it. I made the first set, drilling all the holes myself."

May Broadcast Seal Music

Tone Similar To Clarinet Says Radio Official In Scotland

Belief in the Scottish Hebrides that seals will croon to accompaniment of the clarsach (Highland harp) has inspired a plan to try a broadcast of seal music in Glasgow.

Andrew Stewart, a radio official, struck on the idea after receiving a report from some friends who were boating.

"While passing a school of seals," Stewart said, "the group was singing 'Bonnie Annie Laurie'.

"To their astonishment, the animals crooned in a recognizable harmony."

Stewart said he was skeptical and made a test himself.

"I cautiously approached within earshot of some seals near Argyll," he related, "and crooned a simple lilt.

"The seals responded with a low chorus which distinctly followed the rhythm of my song. Their note is something similar to that of a clarinet."

North American orchids depend for food upon a microscopic organism inside their roots which helps them take in food from the soil.

Mistletoe was known to the Druids as "all-heal"; they regarded it as a cure for all diseases.

If You're Told to "Alkalize"
Try This Remarkable "Phillips" Way
Thousands are Adopting

On every side today people are being urged to *alkalize* their stomach. And thus cure symptoms of "acid indigestion," nausea and stomach upsets.

To gain *quick* alkalization, just do this: Take two teaspoons of PHILLIPS' MILK OF MAGNESIA 30 minutes after eating, OR — take two Phillips' Milk of Magnesia *Tablets*, which have the same antacid effect.

Relief comes almost at once — usually in a few minutes. Nausea, "gas" — fullness after eating and "acid indigestion" pains leave. You feel like a new person.

Try this way. You'll be surprised at results. Get either the liquid "Phillips" or the remarkable, *new* Phillips' Milk of Magnesia Tablets. Delightful to take and easy to carry with you. Only 25¢ a box at all drug stores.

ALSO IN TABLET FORM: Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

MADE IN CANADA

PHILLIPS' MILK OF MAGNESIA

Not War Material

Governments Agree Arms Embargo Does Not Include Gas Masks

Gas masks do not come under the heading of "war material," it was decided in London by the international committee that is attempting to supervise non-intervention in the Spanish civil war. The committee had before it more than a dozen replies from governments, all agreeing that gas masks should not be prohibited under the various arms embargoes now in force. Consequently, the exportation of gas masks becomes legal hereafter to either side in the civil war.

Studied For Long Time

Flying Life Of Wright Brothers Started As Hobby

The Wright brothers began their historic flying life as a pleasant hobby, reading all the books on flying they could get their hands on to see what others had done and then to reckon what they themselves could do with it. They patiently checked and tested to curved surfaces. They flew kites. Making doubly certain of every step, refusing to be hurried, they first spent years in theoretical planning and reading before ready to put an engine into the latest of their gliders and make the first attempt at power-driven flight.

Will Be Decided Soon

The question of whether the King will attend the coronation durbar at Delhi is likely to be settled soon, the Manchester Guardian said. If it is decided in the affirmative, December of next year, between the Indian provincial and federal elections, will be the probable date, the newspaper predicted.

White Meat For Everyone

The family no longer needs to fight over who is going to have the white meat from the Sunday chicken. A chicken farm in Niles Centre, Illinois, using scientific methods involving the use of violet rays in place of daylight, produces chickens with only white meat.

Crochet Them Both ... They're Easy

Household Arts by Alice Brooks

A Beginner Can Crochet These

PATTERN 5408

The right accessories say so much! And a hand-crocheted hat and purse will tell the world you're right in style. The perky hat, done in single crochet, is not only easy, but is grand to wear with a high-collared coat. In the matching purse, the centre panel introduces contrast by a different patterning of stitches. Shop soon for some colorful yarn, with which to crochet this set. In pattern 5408 you will find directions for making the set; material requirements; illustrations of the set and of all stitches needed.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

A Royal Privilege

Toronto Witness Allowed To Affirm Rather Than Take Oath

Rev. D. I. Ellson took advantage of a royal privilege granted to Presbyterians 300 years ago when he appeared in women's court at Toronto.

The minister expressed a wish to affirm rather than take an oath on the Bible in a bigamy case in which he was called as a witness.

"A Presbyterian and not swear on the Bible?" exclaimed Magistrate Cowan.

Told of the royal privilege, Mr. Cowan said he had been a Presbyterian all his life and had never heard of it. He allowed the witness to affirm his intention of telling the truth.

More than 30,000,000 printed papers were destroyed in the last year by the British Post Office because of incorrect addresses.

A new coalfield near Barrhead, Scotland, is valued at $36,000,000.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA CRAIG

CHAPTER VII.—Continued

"What was there to do? I tossed a twenty-dollar bill to one of the attendants to see that he got into his car all right. Such carrion was not worth soiling my hands over."

Pain tore at Starr's heart. His words were properly chosen, but there was something in his careless tone. What he really meant, it was quite plain to her, was that her honor was not worth soiling his hands over! A twenty-dollar bill was nothing. Money smoothed his play-boy path wherever he went. . . . An icy hand clutched at Starr's heart. For it was quite as plain to her that he expected his money to win her. In his own way, on his own terms.

Not for the world, though, would she have let him know she realized that. With a flash of her old bravado, she said flippantly:

"And what does that make me?"

Lance's black eyebrows lifted slightly, and he smiled, with a touch of indulgence.

"I hope it makes me your cavalier for the evening, at least," he said, his voice low, almost a caress. There was a wealth of meaning in his tone which lent his innocent words a deep significance.

Starr turned away from him with a wave of revulsion. Lance Marlowe was quick-eyed; he was trained to the nuances of feminine emotion. He saw his mistake instantly, and his face darkened.

"I should have known better than to use my usual line on you." There was a touch of insolence intoned. Then he shrugged. "I suppose you'll not be wanting to stay any longer—now—so at least I can see you to your car, get your wrap for you, or something?"

Starr cried out almost in a panic. "No—no! Nothing! And I have no intention of running away from—from—oh, any or you!"

But in spite of her defy, suddenly she was fleeing from him. Anywhere to get away. She had said she meant to stay, but all she really wanted to do was to get away forever from this mad, glittering playtime world. It was not in any way what she had expected it would be. Living out her span in drab obscurity was better—a million times—than this!

Half blinded with the tears she was forcing back as she dashed up the balcony steps, she collided with something that stopped her flight. The strong, vital body of a man. A second her face was pressed against the front of a starched shirt; then she looked up, dazed.

"Starr! For Heaven's sake! Where do you think you're going? Out to beat some kind of a record?"

Michael's hands were gripping her shoulders. Michael's face beamed down at her. He was so full of his own satisfaction that he did not even notice her agitation. He could take things lightly like that, make humorous remarks, laugh! when her heart was breaking!

Again she was conscious of the overpowering attraction of his presence, like an intoxicant in her blood, that sent it singing along through every vein in her body. She fought against it desperately. Why must it be like this?

Michael was so pleased that he almost hugged her. Yet his pleasure was simply that of a man who has just put over a good business deal. It was all in the head, not the heart.

He grinned, standing off to look at her with his head cocked a little to one side.

"Pret-ty swell!" he commented. "You are marvelous, Starr—superb! Everything is going just as we planned; better than we planned. You'll be the talk of the town tomorrow!"

The casual cocksureness of the man! An urge as his own end was served, what did he care the price a woman paid? But how could she know he was congratulating himself on his own perspicuity—and his luck! —at picking up a girl who hung out in La Luna and having her turn out like this, as if she had been used to people of this kind all her life? Or perhaps it was her training for her "racket" that helped?

Starr's resentment raged again. Conflicting strangely with her storming emotions. She clenched her fists until the scarlet nails dug into her palms. A cold, brittle voice came through her painted lips.

"I can't go through with it, Michael."

His jaw dropped, and he stared.

"Can't go through with it?" he echoed unbelievingly. "But why? What's the matter?" Has anything happened—"

Suddenly it was he who was agitated. He saw his money-making scheme falling through because of the whim of a girl he should have known better than to have trusted in the first place. His hands tightened their grip on her shoulders, sending shooting sparks of fire through her soft flesh.

He said rapidly: "What's wrong, Starr? Haven't I done enough for you? Isn't the salary high enough? I'll raise it!"

Money! Was that all that men thought about? And this particular one probably thought she was trying to hold him up, now that he had confessed she was making good, better than he had hoped she would.

A deep, trembling sigh shook her whole body, only to be repressed. She realized only too well how hopeless it was to try to explain, to try to make him understand what this night had done to her. She had too plain a memory of the one or two occasions when she tentatively had tried to make him understand that she was not the kind of girl one usually picked up in place like La Luna. He had not believed her. She had known that. All he had seen in her was a good little actress who could carry out his plans, and he was thanking his lucky stars that sometime or other she had known what was called "the better things of life."

She writhed before his taut, searching face. Dusky lashes shadowed against her ivory cheeks, hiding her passion-filled eyes from him.

"Money!" she repeated dully. "That's not the reason. I've changed my mind, that's all!"

"All!" A long moment he paused. When he spoke again a harsh note had crept into his voice. A note of contempt.

"I didn't know you were a quitter, Starr."

Her vivid face flashed up to meet his gaze. What he said stung her more than all that had gone before.

"So that's what you think of me?"

"What else do you expect me to think?" He shrugged, and a queer little quirk came around the corners of his mouth. "Or is it, perhaps, that Lance Marlowe has offered you a more attractive proposition? He would!"

She glared at him, breathless in her instantaneous raging fury.

(To Be Continued)

"And what is your name, my little man?"

"Henry, sir."

"Why did you parents name you Henry?"

"I'm the eighth, sir!"

"Why has your husband been summoned?"

"I'm not quite sure, but I think a policeman held up his hand and Jack put his foot on the exasperator!"

"If you are doing business every day it is necessary to tell the public that fact."

To Ease a Headache Fast
Get Real Quick-Acting, Quick-Dissolving "ASPIRIN"

See How "ASPIRIN" Tablets Work

In 2 seconds by stop watch, an "Aspirin" tablet starts to disintegrate and go to work. Drop an "Aspirin" tablet into a glass of water. By the time it hits the bottom of the glass it is disintegrating. What happens in this glass . . . happens in your stomach.

For QUICK Relief

If you suffer from headaches what you want is quick relief.

"Aspirin" tablets give quick relief, for one reason, because they dissolve or disintegrate almost instantly they touch moisture. (Note illustration above.)

Hence—when you take an "Aspirin" tablet it starts to dissolve almost as quickly as you swallow it. And thus is ready to start working almost instantly . . . headaches, neuralgia and neuritis pains start easing almost at once.

● "Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Try it. You'll say it's marvelous.

Demand and Get—

ASPIRIN TRADE-MARK REG.

Opening His First Parliament

King Edward Will Be Speaking To Crowded House

King Edward will open the first parliament of his reign at Westminster November 3. He will drive in full state from Buckingham Palace to the House of Lords, and will read his speech from the throne to a chamber crowded with peers and peeresses and with the "Faithful Commons" in attendance.

The King will not wear a crown. The crown and the sword of state will be taken from St. James' Palace to the House of Lords in a state landau, guarded by an escort of life guards, and the cap of maintenance, the other emblem of royal power, will be carried in front of the King. Not until he has been crowned at Westminster Abbey in May will King Edward wear his crown.

If he follows the example of his father, who also opened his first parliament some time before his coronation, the King will wear full-dress naval uniform for his drive from the palace, and will don heavy robes of crimson velvet edged with gold for the ceremony in the Lords, putting on the cocked hat of an admiral when he comes to read the speech from the throne.

While he is at the House of Lords the King will carry out another ceremony of great constitutional importance. This is the signing of the royal declaration of Protestant faith, which the sovereign must make either at the opening of his first parliament or at his coronation, whichever comes first.

Another Boat Salvaged

German Battleship Taken From Scapa Flow To Shipbreaking Yard

The former German battleship Kaiserin, salvaged from the sea bed at Scapa Flow, completed her journey from the Orkneys to the shipbreaking yard at Rosyth Dockyard.

She carried a crew of 14 men, who were accommodated in huts erected on the keel, and whose duties were to attend to the pumps which kept the hulk afloat.

Like the other vessels of the scuttled fleet which have been raised and taken to Rosyth, the Kaiserin made the passage upside down, towed by three Dutch tugs.—Edinburgh Scotsman.

VICKS VA-TRO-NOL

Employees Are Protected

Reduction In King Edward's Staff Will Be Gradual

Reorganization of the working of the royal estate at Sandringham has involved a reduction in staff but the King has given an assurance that no employee is to be discharged before he has obtained another job.

Much of the land formerly farmed by the King is to be split up and let to tenant farmers, and the forestry staff is being reduced. The farms retained are being further mechanized. Some of the men thus released are going to the flax factory on the royal estate, started by King George a few years ago.

The report that there will be a considerable reduction in the staff at Balmoral and that the castle is in future to be used purely as a shooting lodge is entirely without foundation. For the sake of efficiency some reorganization will be necessary, but this will in no way affect the King's close association with Deeside.

Seventy Varieties Of Maple

Sugar In Commercial Quantities Only Obtained From One

There are over 70 varieties of maple trees in the world, but only one of the seventy yields sugar in commercial quantities. This is the famous hard or sugar maple which grows in Canada from the Atlantic Ocean to the Lake of the Woods and in the eastern United States. Its beautiful leaf is the national emblem of the Dominion. About 95 per cent. of the maple products' industry in Canada is at present confined to the St. Lawrence River valley.

Flowers of the "Dutchman's-pipe" catch pollen-laden insects and refuse to release them until the blossoms have been pollinated.

Little Helps For This Week

The Lord is nigh unto all them that call upon Him, to all that call upon Him in truth. Psalm 145:18.

Be Thou O Rock of Ages nigh;
So shall each murmuring thought be gone,
And grief and care and fear shall fly,
As clouds before the mid-day sun.

Take courage and turn your troubles which are without remedy into material for spiritual progress. Often turn to the Lord who is watching you amid your labors and distractions. He sends you help and blesses your afflictions. This thought should enable you to bear your troubles patiently and gently, for love of Him who only allows you to be tried for your own good. Raise your heart constantly to God; seek His aid, and let the foundation stone of your consolation be your happiness in being His. All vexations and annoyances will be comparatively unimportant while you know you have a Friend who is such a Refuge.

Tribute To Boy Scouts

In the course of a tribute to the effectiveness of boy scout training during a discussion of juvenile delinquency at the world conference of Rotarians at Atlantic City, Dr. Amos O. Squires of Ossining, N.Y., stated that statistics showed only three out of every 20,000 criminals had ever been boy scouts.

Motorists who insist on their rights often get them. Only they're spelled "r-i-g-h-t," and slow music goes with them.

From the peaks of North Sweden the sun can be seen continuously for six weeks.

A PERFECT TEAM

With NEW PLUG-IN

The quality of radio reception largely depends on your batteries. Ask for Eveready — and be sure!

IT IS AIR CELL that has made battery radio so immensely popular these days. Air Cell—the modern battery—does away with the necessity of re-charging.

Air Cell maintains itself by simply breathing air. It sounds like a miracle and it is indeed one of Science's great achievements. Best of all, peak power level is maintained for 1000 playing hours. No dwindling of power as in other batteries.

And Layerbilt! Well—everyone knows it is the super "B" battery. It is built in tightly-packed layers and gives far longer life than the old-fashioned round-cell types. Thus you don't have to change your "B" battery as often as formerly.

This year, Eveready has eliminated the terminal posts and given you *one* socket—this means only *one* connection for each "B" battery.

For perfect team work—Air Cell plus Layerbilt.

IN LOVING MEMORY

of dear wife and mother, who passed away on Nov. 2nd 1931

What is home without her?
What are all the joyes we meet?
When her loving smile no longer
Greets the coming of our feet
The days are long, the nights are drear,
And time rolls slowly on:
And oh, how few are our pleasures,
When her loving care is gone
